On sale this one day for, per yard 79c	

PATRIOTISM URGED UPON BOY SCOUTS

Roosevelt Says Boys Must Do More Than Sing "My Country 'Tis of Thee" to Be Good Citizens.

Colonel Theodore Roosevelt, former president of the United States and honorary vice president of the Boy Scouts of America, has written an article on citizenship for the New Scout magazine. In it he says that the Boy Scout movement is proving in a practical way of great importance to the country. He points out that the Boy Scout principles make for efficiency in a boy's life, patriotism and citizenship. In outlining the ideals of boyhood he says that the Boy Scout movement promises to bring into the boys world more and more the Golden Rule.

Colonel Roosevelt urges the Scouts to seek that status of things that make the playgrounds impossible for children. He points out to the boys that the qualities of a good scout make for success in business and in life, and that the importance of self-reliance, gentleness, strength and honesty.

I quite agree with Judge Lindbergh, he writes, "that the Boy Scout movement is a movement of peculiar importance to the whole country. It has already done much good and it will do far more, for it is in its essence a practical scheme through which to inculcate in the boys a standard of ethical conduct, proper standards of behavior, and consideration for others, and courage and decency, to boys who have never been reached and never will be reached by the ordinary type of preaching, lay or clerical. I have been particularly interested in that extent of a letter from a scoutmaster in the Philippines, which runs as follows:

"It might interest you to know that a recent fire in Manila which devastated acres of ground and rendered 1,000 people homeless, as two patrols of the Manila Scouts, under the leadership of the five companies, organized by the fire authorities and worked for hours under very trying conditions, helping the distressed natives in places of safety, removing valuables and other articles from homes that apparently were in the path of the flames, and securing cheerfully and efficiently all the tasks given to them by the fire and scoutmaster. They were commended in the public press and a kind editorial about their work was published.

"During the recent carnival the services of the boys were requested by the carnival officers, and for a period of ten days they were out doing their duty in the carnival grounds, directing strangers to seats and acting as guides and helpers in a hundred ways.

What these Boy Scouts of the Philippines have just done, I think our Boy Scouts in every town and every district should train themselves to be able to do.

The movement is a movement for efficiency and patriotism. You try to make the boys turn out as men to be the citizens, and who will if their country needs them make better soldiers for having been scouts. No one can be a good American unless he is a good citizen, and every boy ought to train himself so that as a man he will be able to do his full duty to the country. I want to see the Boy Scouts not merely utter fine sentiments, but act on them; not merely sing "My Country 'Tis of Thee" but act in a way that will give them a country to be proud of. No man is a good citizen unless he so acts as to show that he actually uses the ten commandments and translates the Golden Rule into his life conduct—and I don't mean by this in exceptional cases under special circumstances, but I mean applying the ten commandments and the Golden Rule in the ordinary affairs of every day life.

I hope the Boy Scouts will practice truth and square dealing, and courage and honesty, so that when as young men they begin to take part not only in earning their own livelihood, but in governing the community, they may be able to show in practical fashion their insistence upon the Golden Rule, that the right and right commandments are directly related to every day life, not only between men as such in their private relations, but between men and the government of which they are a part. Indeed the boys even while only boys can have a very real effect upon the conduct of the grown up members of the community, for decency and square dealing are just as contagious as vice and corruption.

"Every healthy boy," continues Roosevelt, "ought to feel and will feel that in order to amount to anything, it is necessary to have a constructive, and not merely a destructive nature, and if he can keep this feeling as he grows up he has taken his first step toward good citizenship. The man who turns down and outwards and outwards may be a good citizen, but only in the negative sense, and if he never does anything else he is not a good citizen at all. The man who counts and the boy who counts, and who builds up, improves, and better living conditions everywhere and all about them."

"But the boy can do an immense amount right in the present entirely apart from training himself to be a good citizen in the future, and he can only do this if he associates himself with other boys. For the Boy Scouts will do this. The best use of a boy is made of them in the playgrounds and in their villages and home towns. A game of roughs may make a playground impossible, and if the Boy Scouts in the neighborhood for their particular playgrounds and for their work, they will show that they won't permit any such game of roughs to have its way. Moreover, let the Boy Scouts take the lead in seeing that the parks and playgrounds are turned to a really good account. I hope, by the way, that one of the prime teachings among the Boy Scouts will be the teaching against vandalism. Let it be a point of honor to protect lawns and flower beds, and so to make our country more beautiful and not more ugly, because we have lived in it."

"The same qualities that mean success in failure to the nation as a whole, mean success in failure to the individual. The Boy Scouts must be against the same forces and view that must hurt the nation; and they must try to develop the same virtues that the nation needs. To be selfish, self-indulgent, or wasteful will turn the boy into a liability, not a man. Just as the influence in such ways in the mind of a nation means the ruin of the nation, let the boy stand stoutly against his enemies both from without and from within, let him show courage in confronting fearfully one set of enemies and in controlling and mastering the others. Any boy who is worth anything if he has not got courage, courage to stand up against the forces of evil, and courage to stand up in the right path. Let his aim be to be selfish and gentle, as well as strong and brave.

"It should be a matter of pride in that he is not afraid of any one, and that he is as gentle as a lamb and as strong as a lion. He is not little things, because they are used at every turn in daily life. Let the boy remember also that in addition to courage, self-reliance, and fair dealing, he must have efficiency. He must have knowledge, he must cultivate a sound body and a good mind, and train himself so that he can act with quick decision in any crisis that may arise. Mind, eye, muscle, all must be trained so that the boy can master himself, and thereby learn to master his fate."

hood, but in governing the community, they may be able to show in practical fashion their insistence upon the Golden Rule, that the right and right commandments are directly related to every day life, not only between men as such in their private relations, but between men and the government of which they are a part. Indeed the boys even while only boys can have a very real effect upon the conduct of the grown up members of the community, for decency and square dealing are just as contagious as vice and corruption.

"Every healthy boy," continues Roosevelt, "ought to feel and will feel that in order to amount to anything, it is necessary to have a constructive, and not merely a destructive nature, and if he can keep this feeling as he grows up he has taken his first step toward good citizenship. He must have knowledge, he must cultivate a sound body and a good mind, and train himself so that he can act with quick decision in any crisis that may arise. Mind, eye, muscle, all must be trained so that the boy can master himself, and thereby learn to master his fate."

"But don't scratch the poisonous skin. Let a mild, cooling, healing compound that stops the itch instantly, draws out the poison in the skin and protects it against further trouble. Just a mild, cooling wash of oil of wintergreen, thymol and a few other ingredients known as the D. D. D. Preparation (the famous in cases of Eczema) and you have mosquito protection for the season. A mosquito repellent—now only the J. H. O'HEILY COMPANY.

"Did you say when your husband comes home very late at night he always brings you a novel?"

"No, I didn't. I said he always brought home a lot of fiction."

"I have been somewhat covetous, but Don's Regatta has just the results desired. They act mildly and regulate the bowels perfectly."—George B. Krause, 208 Walnut avenue, Alhambra, Cal.

MANY PEOPLE ARE TELL THE TRUTH TO EXTERMINATE PRAIRIE DOG

Visitors Constantly Arriving in Growing Little City, Looking for Business Openings and Mimbres Farms.

(Special Correspondence to the Herald) Deming, N. M., Aug. 10.—E. Earl Wright, of Albuquerque, and E. B. Cary, W. Doran and E. V. Anderson of Douglas, Ariz., were visitors in town over Sunday.

R. G. Kleiss, Mr. and Mrs. J. B. Wright and Miss Helen Howard, all of Pecos, Texas, are recent arrivals in the city looking for business openings and with a view to locating here. Mr. Kleiss is in the bankers and insurance business at his home and taking of engagements in the same business here.

The chamber of commerce is in receipt of communications from forty or fifty persons in the east and north saying they are either now preparing for a trip to Deming, or that they expect to visit Deming this fall. It is anticipated that there will be great activity in taking up of Deming agricultural and horticultural lands this fall and winter.

At the Mountain, New Mexico, Chautauque conference, last Saturday was set apart as New Mexico's "source day," with addresses by the governor, the territorial engineer, and experts from Kansas, Colorado and New Mexico agricultural colleges. An address, illustrated with slides, was delivered by R. C. Ely of Deming, on "The Magic of the Sun."

The Deming chamber of commerce had a special representative at the conference who was equipped with half a dozen large photographs and a big box full of booklets and other printed matter, and while nearly every town in the territory was represented there, Deming was the only town which had advertising matter for distribution, with the result that the printed matter was soon exhausted, and this advertising, taken in connection with Mr. Ely's lecture and history views, put Deming definitely on the map of the conference, and everybody was talking Deming, from Governor Mills down to the ground men. The Deming noise was further accentuated by the election of W. W. Holt of this town, as president of the New Mexico agricultural board of the National Irrigation congress, of which H. H. Hanning of Albuquerque was elected secretary. At the meetings of the board will be at call of the president, they will be very soon, preparatory to the meeting of the National Irrigation congress to be held in Chicago next October.

DRIVER IS KILLED BY HEAVY WAGON

Mexican Boy While Driving Wagon Load of Heavy Machinery Caught Under Mass When It Crashed Down Mountain Side.

Silver City, N. M., Aug. 10.—A Mexican by the name of Granadino was instantly killed on the Lone Mountain road last Monday by being crushed under a wagon of heavy machinery when he was conveying the heavy wagon. One of the heavy freight wagons of the Robinson-Corral at Santa Rita was being used to convey a dynamo from Highway to the Robinson ranch to be used in pumping water from the ranch to the Hurley mill. Granadino was driving, and in going down the steep Lone Mountain road, lost control of the heavy wagon which started down the declivity at a terrific rate. In trying to regain control of the team, it is supposed that the unfortunate freighter lost his balance, and fell from the wagon, both wheels passing over his body, crushing it badly. Romeo Rodgers, who happened to be in the vicinity rushed to the man's aid, and seeing that he was badly crushed, jumped on a horse and rode to Highway for a doctor, but by the time Rodgers returned with medical aid, the man was dead. The remains were brought to Silver City, and buried in the Catholic cemetery Tuesday.

Prof. Alexander McPherson, an Expert Agriculturist Advises People to Stick to the Facts in Boosting.

(Special Correspondence to the Herald) Roswell, N. M., Aug. 10.—Prof. Alexander McPherson, expert agriculturist for the Berco Irrigation Farm company, returned Sunday from Mountain, where he gave an intensely interesting graphic lecture about New Mexico soil, and how and why to tell the truth about the new state.

"Tell the truth, and nothing but the truth about New Mexico," is the new slogan for the state, and the agriculturist dwell at length on the advisability of following the slogan's suggestion.

What is truth asked Professor McPherson in beginning his lecture, and then explained to the audience at the Chautauque that as a picture tells the absolute truth he was going to illustrate his lecture for the evening with pictures taken from nature.

He divided his lecture into three heads: the one, orchard, where the McPherson system of irrigation, which the irrigator can irrigate on a month's night with hose, slips without getting his feet wet; and the last, or better cultivation, clean cultivation being preferred for the first five years of the tree's growth, and that the soil will grow the best crops possible for the location or climate.

Mr. McPherson took up the question of frost protection explaining the danger of frost protection of the flower and orchard and the comparison of the business man and fruit grower. Why the system of that frost cut water, to keep the following out of their orchards is something. Here, and it sets them out too. They use a combination of the stream, which is a cross between a watermelon's yell and a woman's scream.

"The speaker then took up the question of marketing and handling. The fruit and gave a minute study of the Roswell Fruit Growers' association. This is when the speaker dwelt particularly on the necessity of telling the truth, and practicing what you preach. He closed his lecture with the illustration of the bugle call with the slide of the bugler, saying that we wanted buglers who will bring out every note clear and true, no tin horn, and with the bugler it is the duty of the masses to make good what the bugler calls, or getting the best out of the soil, then New Mexico, the new state, will prosper as never before.

Mr. McPherson will leave about the 25th for Los Angeles, Calif., and return to Elgin, Illinois, Wisconsin and other special points on a six weeks' Chautauque tour.

Government Officials Engaged in Bitter War Against Little Rodents Now Operating in Arizona.

Prescott, Ariz., Aug. 10.—Dr. A. K. Fisher, in charge of investigation of food habits of birds and mammals of the Biological survey, U. S. department of agriculture, Washington, D. C., and Thos. H. Scheffer, assistant in the Biological survey, arrived in Prescott Sunday afternoon to remain for several days.

During the 12 visits they will make to different sections of the county, where the depredations of prairie dogs and gophers are menacing crops. Dr. Fisher has not been in this city since 1892, when he journeyed through this locality, collecting specimens of animals and plants to demonstrate geographic distribution.

The experts visited farmers near Jerome Junction yesterday afternoon and made demonstrations at the farms of Walter J. Davis and Larry Little. At the Davis place several interested ranchers were shown the process of poisoning strain to secure best results. On the return journey the party stopped at several badly infested farms. Today, Mr. Fisher and Assistant Scheffer, visited other nearby sections. A trip will possibly be made to the Four Mile House on the Walker road, where considerable damage has resulted from the number of prairie dogs and gophers there.

Dr. Fisher is exceedingly anxious to be of the utmost service possible to helpless farmers in Yavapai county and will not limit his trip to two days as previously outlined, if there is further work to be done here.

Proceeding to Phoenix at the end of the week, the experts will journey to Washington, probably visiting northern Mississippi en route.

On Thursday morning at 9:30 o'clock Dr. Fisher will make a demonstration of poisoning grain for feeding prairie dogs and gophers in the Walker road, where considerable damage has resulted from the number of prairie dogs and gophers there.

Interested are cordially invited.
